

Source Wisely, Manage Efficiently

ENRICH YOUR BUSINESS WITH ELIT

Procure To Pay Solution

Our Mission:

Redefining procurement and becoming a one-stop solution globally.

Our Vision:

To revolutionize companies by bringing efficiency, innovations and empowering businesses globally.

About Us

Procurement processes are common and industry-agnostic. What's relevant are the challenges organizations and buyers face on a day-to-day basis that are unique to their business demands.

Every organizational procurement process is unique and there is not one common solution across the industry that truly caters to end-to-end solutioning. For instance, two similar businesses that manage similar purchasing requests and transactional volumes might not be utilizing the same P2P system due to uncertainties and volatility.

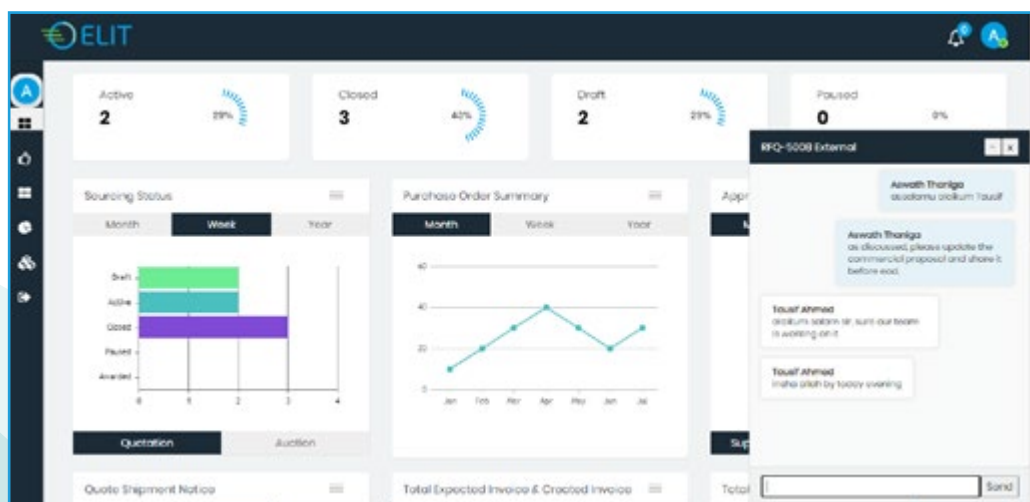

The difference is Workflows. It's high time the supply-chain industry evaluates the importance of workflow relations, internal and external, to determine efficiency areas and improvement touchpoints to increase productivity.

ELIT aims to help businesses to be proactive in increasing their productivity and stay on top with ever-changing business dynamics.

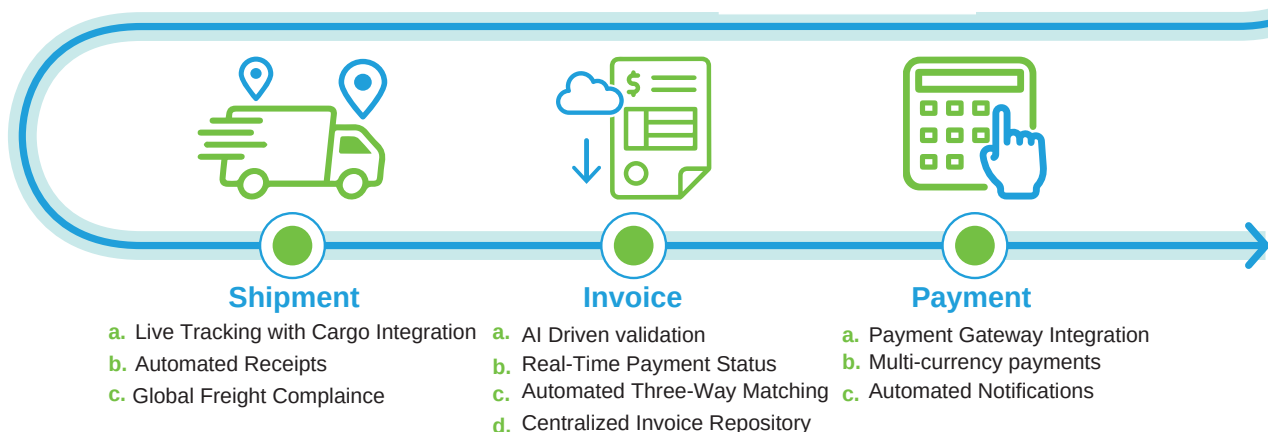

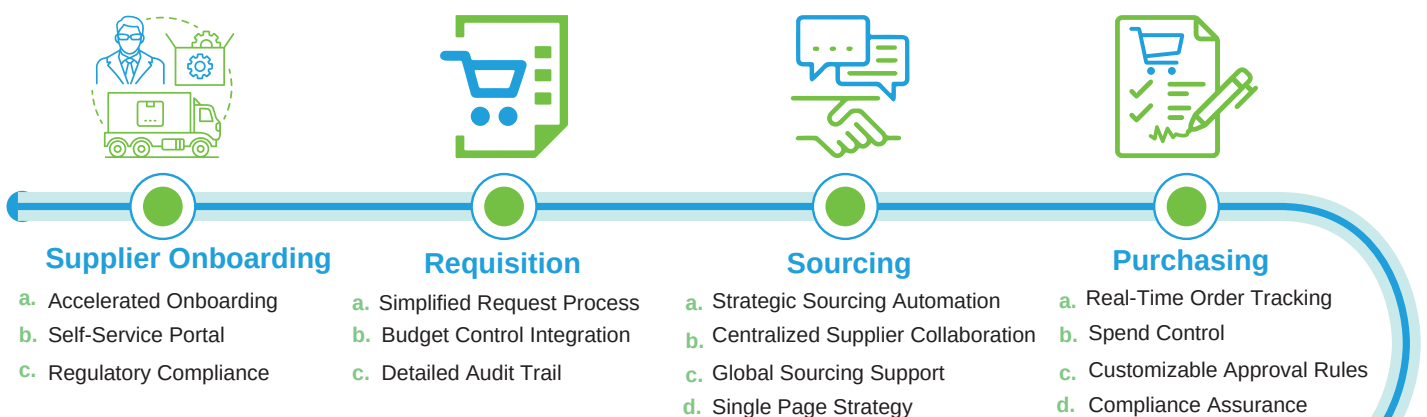

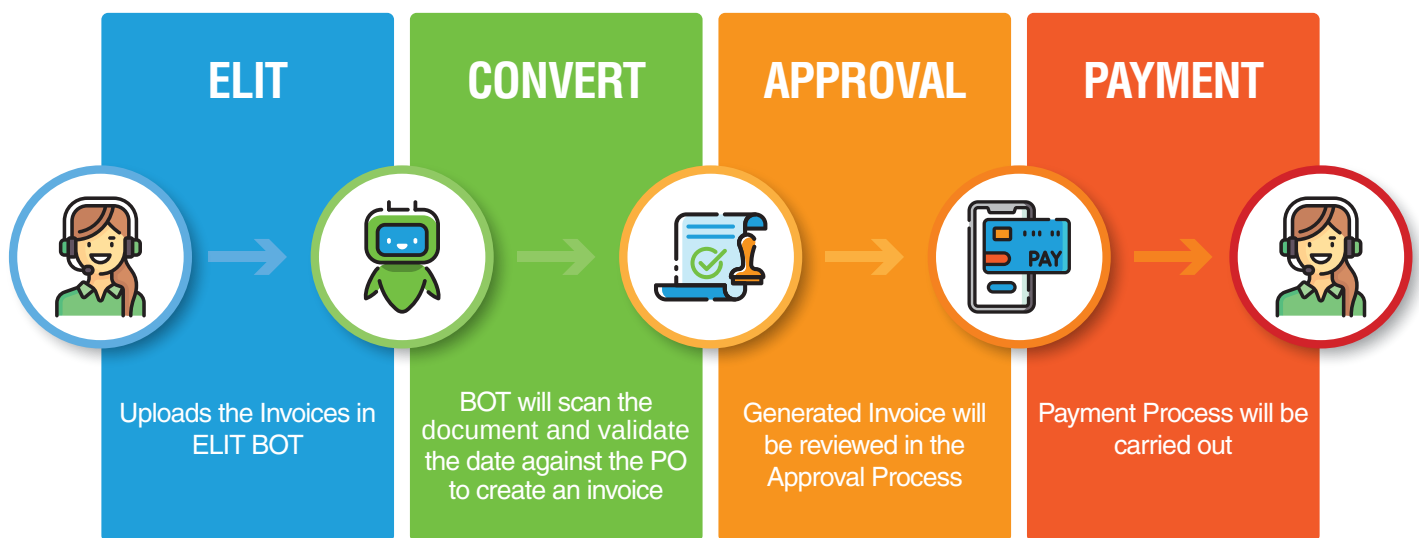

Analytical Dashboard

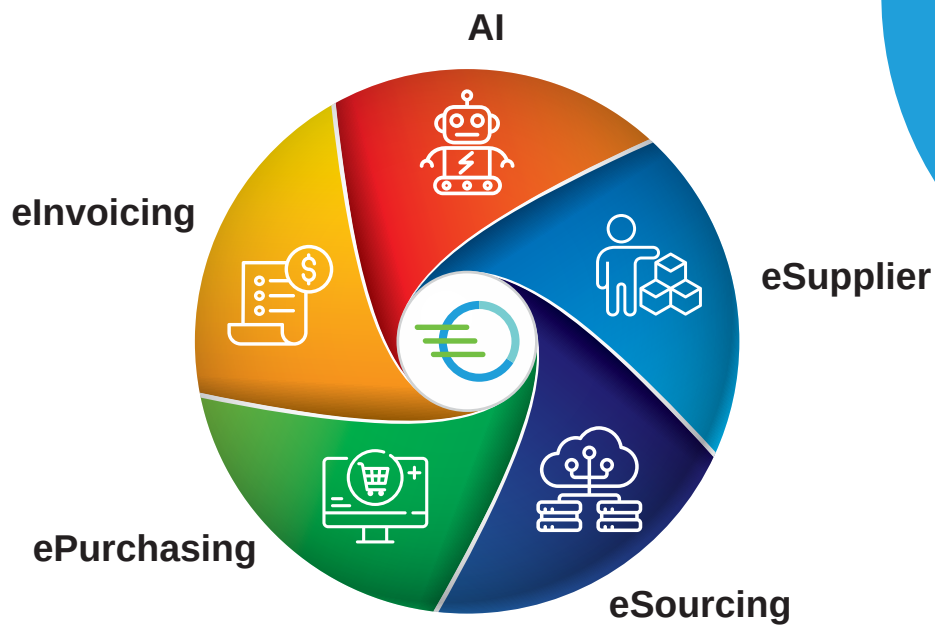

ELIT provides an analytical dashboard for each module and user wise charts. Users can also configure their charts as per their requirements.

eInvoice Automation

AI-powered Account Payables Automation with VAT compliance streamlines invoice processing across the GCC by automating data capture, validation, and approvals, ensuring accurate VAT calculations and adherence to local tax regulations. ELIT minimizes manual errors, enhances financial accuracy, and accelerates payment cycles, providing businesses with real-time compliance and operational efficiency.
